

# pirana purchasing

Easy to use, affordable maintenance software

Pirana Purchasing controls both internal requisitions and external purchase orders placed with a supplier.

Purchase costs can be allocated to specific cost centres and, when used in conjunction with Pirana Maintenance Management, to work orders, assets, locations or contacts.

The system maintains a full history of purchases which may be analysed to give essential information on suppliers, prices and cost breakdown.

**Full Order Lifecycle** Purchase orders are fully controlled from requisitions through to order fulfilment and invoice history.

**Multiple Requests** Multi-user purchase requests & multi-supplier quotation requests.

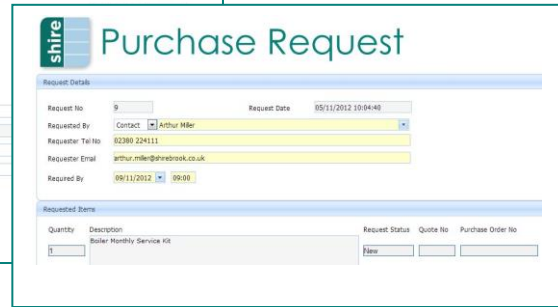

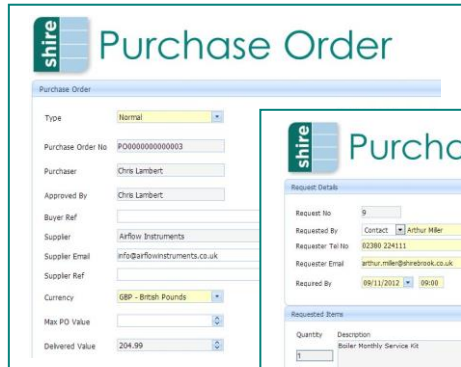

**Non-Stock Purchases** Support for Just-In-Time purchasing.

**Orders & Spend Approval** You can set up limits of authority for purchase approvers to control expenditure through variable limits.

**Automatic Re-Ordering** When running in conjunction with Pirana Stock & Inventory, the system generates stock replenishment orders automatically.

**Full Supplier Information** Full supplier-related actions and details including multiple currencies.

**Comprehensive Reporting** Detailed reports including non-reconciliation, unpaid & un-invoiced orders.

## Why Pirana?

**Ease of Use** The Pirana interface is incredibly easy to pick up; it's possible to get started in minutes!

**Scalable** One size fits all. Pirana is designed for use by one, to any number of users.

**Choice of Setup** Choose from On-Premise (installed) or On-Demand (cloud).

**Secure** Full location security and user access protection.

**Flexible** Configure the system to reflect your own terminology or language.

**Supports Decision Making** KPIs, a powerful reporting capability and advanced filter & search.

**Expert Advice** Shire offers a knowledgeable support service.

**Rapid Setup** Talk to Shire in the morning and you could be using your system later that day!

**Mobile Deployment** Pirana can be deployed on a range of devices including those that are; ruggedised, IP67, ATEX compliant, integral barcode or RFID scanners.

## Features

- Purchase Orders
- Purchase Requests
- Quotations Requests
- Receipts, Returns, Credits
- Invoicing
- Automatic Reordering
- Email notifications
- Export to Excel™
