

pirana stock & Inventory

Easy to use, affordable maintenance software

Pirana Stock & Inventory (Materials Management)

facilitates the management of stock, enabling the user to organise, monitor and control movement at each stage of the receipt / storage / issue and return cycle whilst maintaining quality compliance.

Pirana Stock & Inventory can be run independently or in conjunction with Pirana CMMS providing the flexibility to issue and transfer to persons, work orders, cost centres, locations & multiple stores.

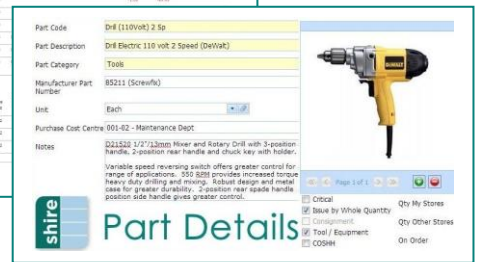

Stock items can belong to both the asset & materials registers and become subject to work orders.

Pirana Stock & Inventory can also be used in conjunction with Pirana Purchasing Management assisting automatic reordering.

Pirana enables processing of periodic & rolling stocktakes, as well as control of serialised and perishable items prior to issue.

Hazard & COSHH warnings can be logged and full location security can be applied.
