

# pirana mobile lite

Easy to use, affordable maintenance software

Pirana Mobile Lite enables quick processing of Pirana CMMS Work Orders on mobile devices such as the iPhone, HTC, Samsung etc.

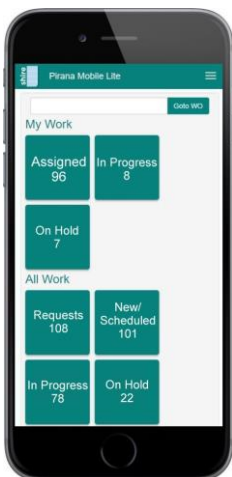

Pirana Mobile Lite liberates your team by allowing them to view, progress, schedule and sign-off Work Orders on their mobile device. It's simple to view your own Job List and Task Instructions as well as those of other team members.

Users are able to sign-off work orders as 'not done' or to put 'on hold', recording start and finish times, as well as capturing ad hoc jobs on the move. It's even possible to 'claim' unassigned Work Requests and Work Orders, bypassing the approval process.

## Cost Savings

The cost reductions are instant. Huge savings on travel, admin, printing and phone call charges are possible.

Pirana Mobile Lite can truly empower your team to work more efficiently and effectively without all of the admin overheads.

## Features

**Easy Setup** It's easy to get started. Simply setup users, issue them with a pin number and then your workforce is ready to process Work Orders on the move.

**Full Security** Access to Work Orders can be restricted in accordance with the security settings you may choose to put in place.

**Time Saving Sort & Filter** Data can be quickly manipulated so that you only see what you need.
