

pirana mobile PRO

Easy to use, affordable maintenance software

Pirana Mobile PRO is an effortlessly simple, yet powerful set of mobile applications for use on or off-line. An essential cost saving addition to any maintenance operation.

Work Orders PRO delivers a wealth of work order detail including documents, parts, labour costs, readings and images.

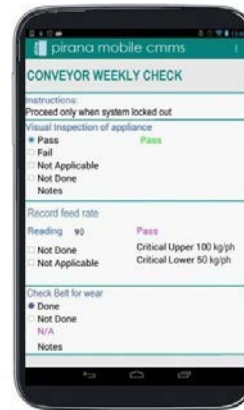

Job sign-off is straightforward and can be initiated by optionally scanning a barcode and recording dates, times, downtime, notes, fault causes, actions & cost centres/codes.

Work Orders are colour coded and can be sorted by work order number, start / respond / required time & dates, subject, location, priority and status. Work Orders can be re-assigned & follow-on work orders created. New work orders can be created for immediate work.

For added security, signatures and PIN numbers can be recorded for both users and clients.

Work Orders PRO will present meters details and routes for easy collection of readings (inc. ad hoc).

Data Collector PRO permits swift & accurate logging of new assets, movements & locations by detailing codes, descriptions, categories, locations, models, serial numbers, priority and security details.
