## Hosted System - Summary

Easy to use, affordable maintenance software

### Full Pirana CMMS Hosted Online

A hosted Pirana CMMS system is fully web-enabled, delivering the best of both worlds for customers who want all the capabilities of Pirana CMMS with all the flexibility that the web has to offer. Full Pirana functionality is right there for you to use 'on demand' enabling you to benefit from a cost effective per user pricing model.

Sign up to hosted Pirana today and you can be up and running with professional CMMS in a flash.

With a hosted Pirana system you can side-step customary implementation delays and can be up and running straight away. You'll also never have to face those time-consuming and scary IT issues that are often the blight of less resilient on-premises systems. Get it and forget it.

### One size fits all

Pirana is ideal for both small and large organisations. The accessibility and economics of the solution will obviously have particular appeal for small to medium-sized enterprises. Those with a mobile workforce will find the advantages simply colossal.

Pirana is a comprehensive CMMS solution for businesses seeking a low-cost, ready-to-use option. A cost effective fee delivers everything: the application, support, backups and updates. Data is maintained at a secure data centre. To get going at your end, you only need a device with a web browser.

### Pirana as a hosted solution is the ultimately affordable, zero-hassle solution to your computerised maintenance management needs

In contrast to a CMMS deployed on your own premises, you don't need any up-front capital, IT skills, new servers or other extra kit. Plus, you don't have to worry about system back-ups, crashes and distractions.

Pirana CMMS offers you the choice - either a fully implemented on premise system or a hosted option, giving you a broad scope of architectural, delivery and licensing options to fit your business needs.

Shire software applications are used by over 10,000 organisations worldwide to manage their critical maintenance activities every day.

### Unique Advantages

- Minimal setup costs.
- No hardware or infrastructure investment .
- No IT skills necessary. Forget about system installation, upgrades, backups, crashes, attacks, etc.
- Easy to access. Accessible on any web enabled device.
- No implementation delay. Super-fast deployment across multiple sites.
- Simple, configurable and future-proof. Sign up for what you need now – you can add to your system at any time.
- Automatic updates. Only one version of Pirana CMMS is ever in use – the latest and best.
- Bullet-proof security. Data is access-protected, fire-walled and backed up for your total peace of mind.
- Lowest total lifetime cost of 'ownership'.
- Cost effective per user licensing .
